

Playground

The Virtual Dojo

www.playgrounddojo.com

Introduction

We are in the middle of Industry 4.0. It is a time of great opportunities and great peril. If we cannot adapt to the changes, we will peril. If we can be one step ahead of the competitors, we will have great opportunities.

The Customer needs are changing in this VUCA world and new technology is bringing more opportunities to deliver value to create better Customer Delight. The way to go is to Innovate. We can innovate by experimenting. The 3rd Principle of DevOps is about Continuous Experimentation and Learning and Practice brings mastery. We need to experiment and try out new ways to improve.

What is Dojo?

Dojo in Japanese means “Place of the Way”. This comes from Marshall Art and later taken up by Target to be the place to Experiment and Practice. This is the place where practitioners come with their business problem, hypothesize the problem and experiment to prove the hypothesis with help of experts and coaches, the learning which they can take back to their projects/products to implement. Dojo is not a place to work on Project to deliver projects.

What is Playground?

Playground provides customers with a platform where they can experiment their problem hypothesis on a pay as you go basis and implement the learnings in their own environment to accelerate their Digital transformation value Realization

We are hosting an immersive learning experience for full-stack teams who comes to learn modern engineering, DevSecOps, DevOps, SRE and VSM practices for practicing, experimenting and collaborating to identify value for themselves through MVP.

▶ Playground is a unique Collaborative Platform - In today's world where people are working from various parts of the world and in a hybrid mode, we need a virtual collaborative platform to Experiment and Learn. Playground is one such platform. Team can use this Dojo collaboratively from anywhere in the world using the application, Google Meet and Miro Boards.

▶ Expert Global Practitioners - Guidance will be provided by practitioners who are having vast experience in their respective fields implementing the tools and processes helping many Fortune 500 organizations.

▶ Partnership and Alliance - Playground has partnered with some of the best-in-class product vendors for experimenting which gives the customers a good representation of the latest tools and technology to solve their business problems.

▶ Hypothesis Based Experimentation - Playground is a platform to come with a business problem and we help in hypothesizing the problem and experiment to prove the hypothesis. The learning can be taken back and implemented in your own organization. Customers can bring their clients and create POCs with expert help and then implement for their clients.

What can you do in Playground?

Services

Implementing SRE Observability

1 Day Concept Discussion
+
3 Days Tool Implementation
